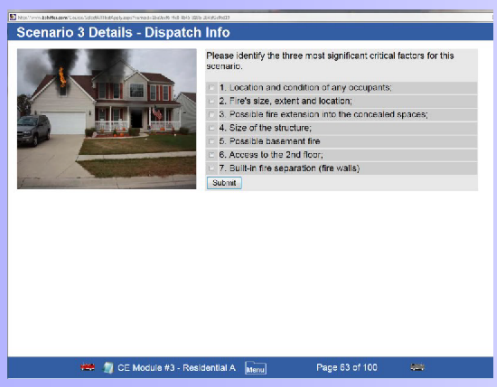
Overview of Blue Card

The Blue Card Command Certification Program is a state of the art training and certification system that teaches company and command officers how to standardize local incident operations across their organization. The program uses a combination of online and in-class simulation training which results in an Incident Commander solution that finally addresses local fire ground operations.

The training is based entirely on retired Fire Chief Alan Brunacini's Fire Command and Command Safety textbooks, which have been used globally in the fire service for over 30 years. The Blue Card Incident Commander Training and Certification Program are designed to manage local, NIMS Type 4 & 5 incidents. These two incident types account for more than 99 percent of a department's incident activity. They include structure fires, accidents, and other "routine" incidents that fire departments handle every day. While Blue Card is compatible with NIMS, it is not ICS 100, 200, or 300; this is a system for what you do every day.



Online Training

Students will complete 50 hours of online training on the 8 Functions of Command from the authors of the program to give every student a consistent cognitive message.

Simulations

Students will must then attend a 3-day (or equivalent) simulation lab using state of the art, high fidelity simulations in order to become a Certified Incident Commander.
