

Assistance to Firefighters Grant (AFG 2014)

Several projects are being completed at the school thanks to the funds received through the AFG program which include:

1. A new Class A Pumper is to be purchased and used at the Dover Training Facility for various training programs.
2. Bullex Car Fire Simulator Prop to be installed at the Dover Training Facility.
3. New state of the art Emergency Medical Services manikins able to emulate real life patient illnesses to enhance our EMS classes.

Technology Upgrade

Each of our portable Data Projector Kits will be receiving a new laptop to better enhance the overheads and video media when presented at your fire station.

Instructor Gear

The school is in the final stages of purchasing a commercial grade gear washer and dryer for the instructor to utilize and keep their respected gear free of potentially cancer causing elements.

Confined Space Equipment

The school recently purchased a Bullex Gas Training Meter to be used in the Confined Space curriculum. This meter will allow the instructor to mimic real life gas readings during a confined space rescue training incident

Grounds and Support Improvements

Flammable Liquids prop

The flammable liquids prop in Dover has undergone some safety improvements including a diamond plate covering for the distribution supply lines to prevent tripping during flammable liquid evolutions.
